## TRIM-TO-SIZE<sup>®</sup> (TTS) AIR FILTERS

Trim-To-Size Air Filters made from aluminum mesh offer the opportunity to customize a filter you can cut to match the size of the filter slot on your furnace, window air conditioning unit, range hood, or many other applications. Since these filter slot sizes can vary greatly, a Trim-To-Size filter is sometimes best, especially if the opening for your filter is oddly shaped. Additionally, you can add foam, carbon pads, or fiberglass media to fabricate low-resistance replacement filters.

Cutting a Trim-To-Size filter is easy. An ordinary scissors or utility knife can be used to cut the material; cutting along a ruler to ensure a straight edge is recommended. Choose from the following types and sizes when you shop for Trim-to-Size filters.

### SPECIAL SIZE - BUILD IT NOW!

- + Quick availability
- + Low resistance
- + Long life

(H x W x D) Nominal	Stock No.	
15" x 24" x 1/4" (381 x 609.6 x 6.35 mm)	9200	Expanded aluminum mesh pad can be Trim-To-Size and made part of the filter assembly.
40" x 64" x 1/4" (1,016 x 1,625.6 x 6.35 mm)	9250	
40" x 64" x 5/8" (1,016 x 1,625.6 x 15.875 mm)	9251	
40" x 50' x 1/4" (1,016 x 1270 x 6.35 mm)	9260	
40" x 50' x 5/8" (1,016 x 1270 x 15.875 mm)	9261	

### APPLICATIONS

- + Range hoods
- + Room air conditioner unit
- + Furnace
